City Spending Leads New Record

Over \$26 Million Will Be Sought

By William "Spud" Murphy

Expenditures this year by the City of Edmonton will establish an all-time record.

An estimated \$26,000,000 will be spent on capital account, educational grants, and operation of city departments and utilities.

Capital expenditures totalling \$8,300,000 were approved by city council recently.

This afternoon aldermen will consider estimates for the operating 1949 operation of department, utilities, and cost of education.

City Commissioners are recommending a 4% rate for the year. This rate has been in effect for the past five years.

Departmental expenditures, including grants to public and separate school boards amount to \$15,700,000. This is approximately \$600,000 more than the actual expenditures of \$15,000,000 in 1948.

Utilities higher
Utilities expenditures this year will total an estimated \$8,300,000, compared with \$6,000,000 in 1948, an increase of \$2,300,000. Revenue from the first time in history, it is anticipated that \$10,000,000 of revenue will be collected by the city-owned utilities.

Utilities expenditures this year will total an estimated \$8,300,000, compared with \$6,000,000 in 1948, an increase of \$2,300,000. Revenue from the first time in history, it is anticipated that \$10,000,000 of revenue will be collected by the city-owned utilities.

Flyers Remain Indaunted Despite Double Defeat

RUSS INVENT ELECTRICITY!

MOSCOW, March 21.—(BUP)—The Academy of Sciences today published an 1,200-page volume of biographies of Russian inventors and scientists which credited the Soviets with inventing electric lighting and electric power.

Three-Year-Old Girl Dies Of Diphtheria

A three-year-old girl died last night at Mackie from a sudden attack of diphtheria, according to Dr. J. A. Gillett, Alberta director of health.

Nearly \$700 Is Given To Assist Sick Child

Pupils of the Calder School today joined in the fight which may mean life or death for a little school-mate.

Many of the 500 children gave their pocket money to the fund, which will enable 10-year-old Maile O'Driscoll, 12775 118 street to undergo an operation to save her life.

She will probably leave Edmonton on Wednesday for the Red Cross Hospital in Rochester, Minn.

Examination to determine whether the child is suffering from a tumor of the brain is scheduled for Friday.

Donations continue to pour in for the golden-haired child, who has suffered continuously during the last two years.

SUFFER TWO YEARS
Almost \$700 had been raised by noon today towards the \$1,200 estimated to cover the expenses of the trip, hospitalization and cost of the probable operation.

Bringing their total to date to nearly \$600, the Calder Community League on Saturday held a dance in their local hall. Residents for pupils contributed to the "Save Maile" fund.

Women of the Elmwood Park Community League yesterday trudged through the snow to collect \$27 from homes in the estate.

Most contributors were ex-servicemen.

LEON GIVES \$100
Members of the Montgomery branch of the Canadian Legion have shipped to Mr. O'Driscoll and private individuals from all over the city are sending donations to the fund.

He admitted rather shamefacedly in common that he and other government ministers may have eaten illegal bacon at a recent week-end Labor party conference on the Isle of Wight.

He said he understood that the local food control committee had seen a lawyer about prosecuting those responsible for allegedly serving those at the conference nine pounds of bacon, equal to eight weeks' rations.

Prime Minister Clement Attlee was among those present.

Prime Minister Clement Attlee was among those present.

YEAR-OLD GIRL HAS 20 TEETH

VICTORIA, B.C., March 21.—(CPI)—Fourteen-month-old Ramona Childs of Victoria has 20 teeth, the first time a child has been reported to have 20 teeth at this age.

Elizabeth Ann David of 12, now has the same number of teeth but took a longer time to grow them.

"BRAND NEW SERIES"
"It's a brand new series now that we're back home," said Andy Chelovick, right winger who played the great in goals this season while finishing third in Dunlop and McLaughlin in the point race.

"We'll beat those Caps twice here and then while we're down to size when we go back to Regina later in the week," Chelovick continued.

"Third game of the series is scheduled for the arena tonight, starting at 8:30 o'clock."

24 HOURS FOR TREK
Flyers pulled out of Regina early yesterday. It took them close to 24 hours to make the last home such as the vagaries of railroad schedules at the weekend.

Caps, who did not shake Regina until last night, are due to arrive in the city later in the day.

Art Somers, Regina coach, so far has refused to do any forecasting as to the probable length of the series.

And all Frank Currie, club head, has offered to say is that he is "Shucks, we aren't giving up yet."

CANT FEEL IT
It's First Spring Day We're Told

"Today is the first day of spring, but any grass which has 'risen' is strictly an optical illusion."

As for the bird which is allegedly on the wing, he's probably on the wing having it back to the sunny south faster than a jet with a hurricane for a tail wind.

With the sun in the spring equinox, it's a great day for the astrologers who have their eyes on the stars, and a terrible day for citizens who have their feet on money, say payments.

According to astrologers, days are supposed to get longer from now until June 21. At any rate, the spring equinox will not affect the length of the day.

—between now and payday.

Truman Returns From Vacation

WASHINGTON, March 21.—(AP)—President Truman said yesterday on returning from a two-week Florida vacation that he will send the North Atlantic treaty to the Senate for ratification as soon as he has been signed.

The president flew here from Key West, Fla.

The right participating countries expected to sign the pact April 4.

U.K. Will Recruit German Police

LONDON, March 21.—(BUP)—Britain will recruit 5,000 German policemen for special patrol duty on the Russian-German boundary in Germany, foreign undersecretary Christian Winter announced in Commons today.

Negligence By Firemen Alleged

Judicial Probe To Be Demanded From City

Gross negligence is charged against the Edmonton Fire Department in the Northern Hardware Building fire in a brief to be filed with civic authorities within the next few days.

George H. Scott, president of Northern Hardware Ltd., owners of the building, and Walter S. Campbell, official of Gault's Alberta Ltd., are drawing up an 11-page complaint. Mr. Campbell announced today.

Demand for a judicial investigation of the fire department, concerning its leadership and equipment, will be made, Mr. Campbell said.

HEAVY DAMAGE CLAIMED
More than \$200,000 damage is said to have been caused in a 36-hour fire at the six-story warehouse building on 104 street on March 18-19. Cause not determined.

Alberta Ltd. suffered heavy loss at the old Northern Hardware firm.

Mr. Campbell doubted if the complaint would be ready for presentation at a special meeting of city council this afternoon. The council meeting is called to consider a report of the fire department.

LONG DAMAGE CLAIMED
Scott and Campbell contend there was long and unnecessary delay in getting lines of hose into the building. The fire contained the fire could have been put out within a couple of hours.

Four union men entered the fourth floor soon after the outbreak. The complaint also contends the department has no equipment for fighting fires in buildings higher than three stories.

Reference is made in the complaint to the fact that the fire department has no equipment for fighting fires in buildings higher than three stories.

B.C. LOGGER GETS \$58,000 WINDFALL

COMAX, B.C., March 21.—(CPI)—Tommy McQuillan, a logger at this Vancouver Island town, is \$58,000 wealthier today.

McQuillan received a cable from a sister in Australia telling him he had won \$58,000 in a state-sponsored hospital sweepstakes.

He's happy—but says it's not going to make any difference in his way of life.

He's still selling trees.

Road Accident Victim Dies

Seventeen-year-old Gordon Shaffer of the Achuson district, 15 miles west of Edmonton, died in a city hospital last night, about 30 hours after he had been critically injured in a highway mishap on the Jasper highway near Winterburn.

Also injured in the accident was Morley Shaffer, Gordon's 10-year-old brother, who was still in hospital last morning. His condition was reported "good" by hospital authorities today, who said he is making good progress.

Mr. Lydia Shaffer, the boy's mother and Shirley Shaffer, 12-year-old sister were also injured, but not seriously and did not require hospital attention.

The accident occurred when the car, driven by Gordon Shaffer, swerved to avoid a truck and rolled over a steep bank before coming to a stop in a deep ditch, according to RCMP.

The Shaffer car was believed travelling close behind a truck when the accident occurred.

Dr. M. M. Cantor, provincial coroner, said today there would be no inquest into the fatal accident.

Golden Spike Driven Deeper

Golden Spike discovery, Imperial Schorpp No. 1, has doubled the pay zone of the recent Western Hemisphere discovery of 1948.

Last week taken at the well for the interval 5,945 to 5,850 feet gave an immediate gas blow at the rate of 107,000 cubic feet per day and a recovery of 3,275 feet of oil in the drill pipe. No water showed up with the last. Valve was open for one hour.

Now the well brings the thickness of proven pay zone to 200 feet. Thickness of the productive zone was known to be the thickness of pay zone discovery of last year, was 140 feet. Lately's oil pay zone is 30 feet.

Again stepping up the rate of testing in an effort to find the bottom of the zone a core of 20 feet was taken. The core was further testing. Originally the well started coring and testing at 10,000 feet intervals. These were later increased to ten, and now a 20 interval is being employed when necessary.

Wallace Scores Atlantic Pact

MOSCOW, March 21.—(BUP)—All Moscow newspapers published the full text of the Atlantic pact on their back pages without editorial comment.

The government newspaper, Izvestia, also carried an open letter from Henry A. Wallace to the National Council of American-Soviet Friendship condemning the pact.

Wallace said that if the American people had the possibility to consider the secret decision behind the pact they would reject it in audience today by Pope Pius XII.

Received By Pope

VATICAN CITY, March 21.—(AP)—James Cardinal McGuinness, Archbishop of Toronto, was reported to be in audience today by Pope Pius XII.

Over \$26 Million Will Be Sought

Expenditures this year by the City of Edmonton will establish an all-time record.

An estimated \$26,000,000 will be spent on capital account, educational grants, and operation of city departments and utilities.

Capital expenditures totalling \$8,300,000 were approved by city council recently.

This afternoon aldermen will consider estimates for the operating 1949 operation of department, utilities, and cost of education.

City Commissioners are recommending a 4% rate for the year. This rate has been in effect for the past five years.

Departmental expenditures, including grants to public and separate school boards amount to \$15,700,000. This is approximately \$600,000 more than the actual expenditures of \$15,000,000 in 1948.

Utilities higher
Utilities expenditures this year will total an estimated \$8,300,000, compared with \$6,000,000 in 1948, an increase of \$2,300,000. Revenue from the first time in history, it is anticipated that \$10,000,000 of revenue will be collected by the city-owned utilities.

It Happened TODAY

Great Britain

Britain must trade more with the United States and Canada. They eat too much food and use too many raw materials. They have not earned. That's what Britain has been told by Harold Wilson, president of the British Board of Trade. More American dollars must be obtained and soon, Wilson says.

HAROLD WILSON
... He will follow.

The Services

Canada's Navy is charged with intercepting a Soviet navy force attacking St. John, Antigua in the Caribbean. Six Canadian ships from both Atlantic and Pacific fleets are engaged in maneuvers, taking the form of a mock battle against units of the Royal Navy.

Atlantic Pact

The North Atlantic Pact is the latest insurance against a Third World War. Vincent Alexander, Canadian Ambassador-General, is in a Los Angeles address. Speaking at University of California, Vincent Alexander said it is some comfort in these troubled times to know the western nations are moving toward a policy of mutual defense.

Armament program of the Atlantic Pact powers will remain moderate, according to the real capabilities of each participant nation. French defense minister Paul Ramadier said.

André Vassilopoulos, new Soviet foreign minister, is expected to spearhead Russia's attack on the North Atlantic Pact in the United Nations General Assembly. So far the Russian press has been the only visible voice in opposition to the pact.

Aviation

United States cargo planes can now carry tanks weighing 25 tons. The Sherman tank of the last war weighed about 25 tons but scientists are designing tanks and artillery of aluminum and alloys that can be easily carried in empty cargo planes.

Russ Radio Denounces North Atlantic Treaty

LONDON, March 21.—(RUP)—Moscow Radio again and then made a world of denunciation today against the Atlantic treaty and against the possibility that a similar pact might be negotiated to cover the Pacific.

Twelve times in eighteen hours, Moscow broadcast pointed, direct and hostile and said that if Russia were given the chance she could lead the world to peace. It was insisted, the western powers were bent on aggression and were headed for disaster.

In course of the broadcasts Moscow virtually called the roll of countries on the fringe of the Atlantic treaty. The broadcasts made the following points: Italy—If Italy signed the Atlantic treaty she would violate her peace treaty. But the treaty already has been violated because the United States is operating air fields in Italy's former North African colonies and units of the American army are "based at Italian ports."

Crime

A jury has found a wife and her "boy friend" in the death of a young man. The victim's husband in Los Angeles. Acquitted is Betty Ferrell and Charles Foss, charged jointly with the slaying of Mrs. Ferrell's husband, Jerome. The husband was shot and killed in death on Oct. 26 last.

The Nation

For the 10th year in succession, Canada's First World War widows will march on Capitol Hill, seeking increased allowances. Widows will seek a \$10 monthly raise in the \$100 monthly allowance given non-disabled widows under the War Veterans Allowance Act. High cost of food and housing is given as reason for the demand.

Creation of a Canadian republic will be sought in parliament by Wilfrid Laurier, Independent Liberal member for Quebec. Mr. Laurier is expected to get far with his motion. It will not likely even get to a vote in parliament.

ANDRÉ VISHINSKY
... New Soviet

Great quantities of eastern Canada timber will be purchased this year by the British Timber Control, New York. The purchase of Miss Correll's house was not disclosed.

The Arts

Andrew Schachtel Correll is doing fine art treatment in St. Louis's Hospital, New York. The purchase of Miss Correll's house was not disclosed.

Sealing

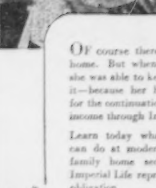

More than 20,000 seals have been slaughtered in the first week of seal hunting operations in the North Atlantic. One boat alone, the Veteran Eagle, reported killing 8,000 "cubs." Norwegians, Canadians and American sealing vessels are taking part in the annual seal "harvest."

Russ Radio Denounces North Atlantic Treaty

LONDON, March 21.—(RUP)—Moscow Radio again and then made a world of denunciation today against the Atlantic treaty and against the possibility that a similar pact might be negotiated to cover the Pacific.

Twelve times in eighteen hours, Moscow broadcast pointed, direct and hostile and said that if Russia were given the chance she could lead the world to peace. It was insisted, the western powers were bent on aggression and were headed for disaster.

In course of the broadcasts Moscow virtually called the roll of countries on the fringe of the Atlantic treaty. The broadcasts made the following points: Italy—If Italy signed the Atlantic treaty she would violate her peace treaty. But the treaty already has been violated because the United States is operating air fields in Italy's former North African colonies and units of the American army are "based at Italian ports."

Government Lead Upheld in France

Queuille Party Running Ahead in District Voting

PARIS, March 21.—(RUP)—Premier Henri Queuille's middle-of-the-road coalition government was reported running far ahead of both Communists and de Gaulleists today as half the returns were counted in the French departmental elections.

Official returns for 608 seats in departmental parties 308. De Gaulleists 108 and the Communists 108. Independent Republicans took 27 seats and various other parties 27 seats.

MODERATE PROGRAM
The vote seemed to assure continuation of France's moderate government, which emphasized the need of stabilizing prices and the franc, halting inflation and restoring the country's national economic recovery.

Gen. Charles de Gaulle's two-year-old rally of the French people, urged ahead of all other popular votes in both popular vote and seats captured. Close behind in popular votes came the Communists, although they seemed to be suffering a setback in the number of seats actually won.

1,500 COUNTRY SEATS
The elections, held throughout France's 80 departments Sunday, were to fill 1,500 seats in the departmental or county constituencies.

The elections appeared to be a blow against the Communists, who had run up a large popular vote but failed to gain the absolute majority needed to put their candidates in office. In the runoff elections, however, only a simple plurality is needed.

The Communists campaigned mainly on attacking the Atlantic pact and the Marshall plan and pointing to themselves as the "peace party" of France.

Unemployment Shows Decrease

Edmonton's unemployment situation improved slightly during the last week, employment officials here said today.

Unemployment permits registered at the Edmonton office numbered 264 last at the end of the week than at the end of the previous week.

The decrease is mainly due to the start of some spring work. There were 4,330 male and female persons registered at the Edmonton office at the end of the week, but of these 111 had been unemployed for more than 13 weeks. The previous week 4,170 unemployed were registered and only 281 had been placed in jobs.

"Can you lead me a Paradol tablet?"
Where a Girl doesn't want to lose her figure and have to make elaborate excuses—she's Paradol she says for Paradol makes each relief from suffering caused by periodic pains—headaches, too—without disagreeable after-effects. And your doctor for Paradol, scientifically compounded from 4 ingredients. The name "Dr. Chase's Paradol" is your assurance.

Quick Relief from Pains

Yes, she is a widow...but HER HOME IS NOT FOR SALE

OF course there is a mortgage on her home. But when she became a widow she was able to keep the home—and run it—because her husband had provided for the continuation of a large part of his income through Imperial Life Assurance.

Learn today what The Imperial Life can do at moderate cost to give your family home security. Call in your Imperial Life representative—there is no obligation.

City Spending To Set Mark

(Continued from Page 1)
In the operation of the trust's system, but all other utilities will show substantial net surpluses.

Total of \$2,143,817 will be paid into the city's treasury by the utility in net surpluses, revenue taxes and franchise and property taxes. In 1948 \$3,100,000 was paid from these sources.

MORE FOR SCHOOLS
Public school board levy this year is estimated at \$2,239,000 compared with \$2,000,000 last year, an increase of \$239,000.

Separate school board levy is set at \$263,874 against \$200,000 in 1948, an increase of \$63,874.

Library board grant this year will be approximately \$20,000 above the \$7,460 spent by this board in 1948.

The library board's 1948 expenditures for this year at \$13,076. Capital charges in 1948 will amount to \$98,130 compared with \$68,000 last year.

Other factors in the approximate \$200,000 increase in expenditures are \$40,000 increase in the police department's estimate and a similar amount for the fire department.

Assessor's office estimates show an increase of \$7,000 building inspection office \$13,000, civil relief, \$2,000, while the city engineer's department shows a decrease of \$8,000 in its expenditures.

Debris collection in city grants is proposed. They will be cut from \$12,136 to \$8,443 if recommendations of the city commissioners is accepted by aldermen.

Police Chief Reginald Jennings is asking for eight additional policemen and a third police motor to spend a few days with her mother, who hopes to marry the prince soon.

Negligence Is Alleged

(Continued from Page 1)
plaint to the fire in the same building in May of 1938 which was followed by a judicial investigation conducted by the late Mr. Justice T. M. Twiss.

The inquiry found negligence and negligence did exist in the fire department at that time.

As a result there was a sweeping reorganization of the department.

Aldermen Will Study Report
Reports from Fire Chief James A. Macgregor and Norman Arnold, physical instructor to the fire department, on the recent \$100,000 fire at Northern Hardware Building will be considered this afternoon by aldermen.

Wooden partitions in the building made the fire difficult to combat, according to Chief Macgregor.

HEAT HANDICAP
Aldermen were handicapped in their efforts to cope with the fire through the intense heat and creative smoke even with the use of gas masks.

Chief Macgregor reports it was not possible for firemen to enter the building from the fire escape on the fourth floor because of heat and smoke, and were forced to fight the fire from outside.

Mr. Arnold reported that 30 firemen were treated either by doctors or first aid for eye injuries from flames, under a heat treatment.

It was confirmed that intense heat was driving firemen back from inside the building.

LENS REPORTED
He reported considerable misting of lens of gas masks which with

U.S. May Use Rocket Range

SYDNEY, Australia, March 21.—(AP)—A government spokesman said last night the United States undoubtedly will give the use of Australia's 3,000-mile rocket range—if she asked for it.

Thus far, however, no such request has been made, the spokesman said, concerning a story in the Sydney Sunday Sun that the United States soon will be sending rockets on Australia's big desert range.

The Sun story said the Australian government had approved, through the British government, a United States request for use of the range and that a formal agreement would be concluded soon.

"Under the agreement for use of the range, America will be available to Australian scientists to latest developments," the paper said.

The rocket range is on the central Australian desert. It extends more than 1,000 miles from its base at Mount Bibo to Christmas Island in the Indian ocean, where the Australian government is believed to be erecting observation posts.

The terrific heat militated against full efficiency of the equipment. In the later stages of the fire, Mr. Arnold reports, some of the firemen were not in fit condition to wear masks owing to their tired and exhausted condition.

Chief Macgregor reports it was not possible for firemen to enter the building from the fire escape on the fourth floor because of heat and smoke, and were forced to fight the fire from outside.

Mr. Arnold reported that 30 firemen were treated either by doctors or first aid for eye injuries from flames, under a heat treatment.

Safecracking

Foiled, 3rd In Two Weeks

Thieves made an unsuccessful attempt to crack a safe in the Haycock Lumber Co. Ltd. office, 1072 101 street, Saturday night after entering the building by unsnagging a window.

Dial of the safe had been punched, but it was not opened. Police said a hatchet and steel punch were found near the safe.

A cash box had been forced open, but no money had been kept in it during the week-end. Other drawers were ransacked, but nothing was reported missing.

This marks the third unsuccessful attempt at safecracking here in two weeks.

An automobile jack, valued at \$25, was stolen from a parked car last night during the "week-end."

William E. Lipsett, Wales Apartments, at 108 street and Kingsway, told police the jack had been taken from his car while it was parked near his home.

A 1948 sedan was stolen from the McCleary Service station at 1084 50 street sometime during the "week-end." Police said the stolen automobile belongs to Steve Chalk, 8015 115 avenue.

Thief of a parka valued at \$10 was reported Saturday by Clifford Ortel, 1236 8th street. He said police that it had been taken from a hallway in his home.

HONG KONG VETERANS TO GET SPECIAL PAY

The Canadian government is looking for Hong Kong veterans, who were war-time prisoners of the Japanese, to give them money.

An Ottawa announcement by Defence Minister Claxton revealed Canadian prisoners-of-war, captured at the fall of Hong Kong shortly after Pearl Harbor, are entitled to Japanese Campaign Pay.

Western Army Command today issued an appeal to all veterans affected to write to the Director of Army Pay Services, Army Headquarters, Ottawa, giving their full names, regimental numbers and permanent address.

Information as to details of the retroactive pay and amounts were not known, but the veterans will receive reimbursement from June, 1945, until up to two months following their return to Canada. This amounts to nearly two years for many of the repatriated men.

Air Force Prepares Third Arctic Flight

While the RCAF prepared the third flight to evacuate four remaining Eskimos from Somerset Island this week, the four natives flown here Friday are resting today at Cammell Hospital with a variety of ailments.

J. R. Mathews Dead At 81

John Rusk Mathews, resident of Edmonton for 36 years, died yesterday at his home at 10427 116 street, in his 81st year.

A native of Markdale, Ont., Mr. Mathews was a commercial traveller for many years throughout central Alberta with the Great West Salesbury Co. He later went to work with other firms prior to his retirement in 1938.

He is survived by his wife and one sister, Miss Leona Mathews of Markdale.

Funeral services will be held tomorrow from Andrews-McLaughlin chapel at 1:45 p.m. Rev. Thomas H. Jackson will officiate.

House Committee Talks Margarine

Only One Consumer Group Sends Delegate To Meeting

Contentious question of coloring of margarine in Alberta came before a special agriculture committee of the Alberta legislature today.

Only one consumer group had representation to the committee. That was the Montgomery Branch of the Consumers' Union, represented by F. Pettit, assistant executive secretary.

NO DISCRIMINATION

Mr. Pettit produced a resolution passed by the Legion branch yesterday which asked no discrimination against the sale of margarine in Alberta. He said the Legion had asked to stand on the question of coloring.

He said the veterans' organization would be content with margarine being made available and that the color of it would be a matter of indifference.

Sale of margarine should be banned entirely in Alberta, R. C. Marler, president of the Alberta Federation of Agriculture, said in a submission to the legislative committee.

DRIFT IMITATION

"However the announced policy of the Alberta government has passed as it drew a ban on the direct imitation of butter by a substitute colored 'yellow,' Mr. Marler continued.

The agriculture committee of the legislature included every M.L.A. present.

Jasper Photographer Named Conductor

JASPER, March 21.—Harry Rowed has been selected as one of the conductors of the U.S. Camera Magazine tour to Jasper, scheduled June 22 to July 5.

Other conductors are Norris Harkness, photography editor of New York Sun and W. H. Robinson, photography chief for Canadian National Railways.

The tour will operate in three sections from Jasper headquarters. One group will go to Malaga Lake, another to Teton Valley and the third to Mount Robson and Berg Lake.

These U.S. camera tours have become the most popular photographic vacations on the continent, as travel and photography go hand in hand.

At Jasper the camera enthusiasts will devote about half time to scenic photography, with the remainder of the tour to themselves.

DISTRICT NEWS IN BRIEF

Council Approves Levy on Business

WESTLOCK, March 21.—A business tax will be imposed on Westlock's places of business during the coming year, it was decided at the regular meeting of the town council last Thursday night, when the town was discussed.

No system of levy has been adopted, but council will contact Town Assessor Gee, for a proposed scale of charges.

Council appointed its members as committee heads of various town responsibilities during the evening. Councillors Dubery and Renaud were appointed to public works; Councillors Hutchinson and Renaud to the building and building by-laws committee. Responsible for customers' water supply and variations in the country and relief matters is Councillor Blacklock, and Finance Councillor Conklin. Water supply chairman is Councillor Black.

Resolving H. Hilde, A. E. Miller was appointed to the Health Board, joining present appointees Sumner and Dr. Sande.

Council tentatively approved a proposal with the Agricultural Society for the use of the arena, whereby the society would be justified in levying some \$200.00 in return for a ten year lease on the structure.

Council approved a plan whereby no accounts would be paid without an order supplied by one of the town officers.

Councillor Dubery was appointed deputy mayor for the next term. Discussion also was given to the proposal concerning purchase of a power grader for the town.

Other business was of a routine nature.

Division Teachers Hold Institute In Thorsby High

THORSBY, March 21.—Four "Institute" of the teachers of the Strawberry School Division was held in the high school. The meeting was under the chairmanship of the superintendent, C. Pych. Mr. Aldridge, supervisor and director of guidance of the department of education, was the principal speaker. He outlined the purpose of the institute, the importance of education, and how they should be kept.

Superintendent Pych dealt with a few of the immediate problems facing different teachers in the division. The afternoon session was in the form of a local A.T.A. meeting.

Attendance was very good, about 46 teachers were present. The two local school buses were used to transport the different teachers from all parts of the division. Another institute is to be held some time in May.

WATER USERS HOLD MEETING

KAISNA, March 21.—Berry Creek Water Users Association held a meeting at Castford last week. Lengthy discussions pertaining to many aspects of irrigation took place. Farmers and ranchers from Warshaw and Carleton attended.

The executive of the association consists of C. A. Coughlin, H. Farnier, C. Seidert, W. O. Turner, and L. E. Holmes.

The association expects to hold a general meeting in the near future.

Two Hills Board Backs Red Cross

TWO HILLS, March 21.—The Red Cross campaign was launched during the recent meeting of the Board of Trade, of which Richard Kamel is president. Mike Kitzke, secretary and John F. Elio, treasurer. A town campaign is being organized.

In a juvenile hockey game played at Vegreville recently, the Two Hills club defeated the Vegreville boys to the tune of 5-2.

The brilliant play of goalie Jundke kept the Vegreville club scoreless for more than half the game. Tanne and Hryncz each flashed the red light three times and Hartman followed with two. This was Vegreville's first defeat and Two Hills' seventh straight win.

Thorsby Organizes Teen Town Club

THORSBY, March 21.—Thorsby Teen Town was formed recently. At its first meeting, Frank Reed and Evelyn King were elected as president and secretary. It was decided to meet in the high school auditorium every Wednesday.

During the last meeting, Alice Shram, Ruth Arthur and June La Forge outlined the plan for the club. The club will have a variety of activities, including social and athletic events.

Eisenstraut Skips School Winners

BOTHA, March 21.—Six rink took part in the recent high school bonspiel. Freddy Eisenstraut skipped the winners in the first competition, with Corrine Church's rink taking second prize. Rudy Eisenstraut won the second event, with Lewell Helm runner-up.

Hardwick competition prizes went to Jim Aldridge and Jack Groves. Corporal McKinney, of the R.C.M.P. from Stettler, showed finesse of interest to the intermediate and high schools in Botha.

Judge Holds Killam Trustee Election Void

WETASKIWIN, March 21.—In a decision handed down by Judge H. B. Frazer in division court held in Wetaskiwin court house, John Gaier was ordered to vacate his seat as a school trustee for sub-division four in the Killam Municipal school district. Another election will be held in April.

The election was very close, John Gaier getting 238 votes to 236 votes cast by G. White, David Victor, York was the relator and was represented by R. W. Manley, K.C. John Gaier was being represented by Nelson V. Buchanan, K.C., Edmonton.

Application that Gaier should be reinstated was brought on the grounds of certain alleged irregularities in the election.

During the course of the hearing it developed that certain other irregularities had also occurred. It was held that the annual meeting of the trustees had also occurred, but that the annual meeting of the trustees had also occurred, but that the annual meeting of the trustees had also occurred.

At the conclusion of the hearing the local delegates felt very proud of their Hanna organization. They had decided that it was one of the most important groups in the province, taking into consideration the population of the town.

Hanna Delegates Attend Conference

HANNA, March 21.—Fourteen Hanna delegates from here attended the 3rd annual western Canada Town conference held in Edmonton last week end. They were Ken McIntyre, Evelyn Blackman, Shirley Grover, and Elsie Liska.

At the conclusion of the conference the local delegates felt very proud of their Hanna organization. They had decided that it was one of the most important groups in the province, taking into consideration the population of the town.

Barth Rink Wins Millet Bonspiel

MILLET, March 21.—With the return of colder weather, curlers were also to compete the bonspiel sponsored by the farmers.

J. O. Aldridge, the local curling champion, was the first to take the challenge with C. Grapevine runner-up Skip H. Pogue captured first honors in the secondary, second prize going to W. Thiel.

5 Trochu Defeats Alix Club 10-9

TROCHU, March 21.—Trochu scored out Alix 10-9 in a hockey scoring feat here Wednesday night. Alix was about 4-3 at the end of the first period and the count was 8-4 after the second.

Hayworth (2), Bert (2), Green (2), Trochu (2), McKinnon, scored for Alix and Christianson (2), Bill (2), Dodd, A. Stone, P. Stone (2), Evans and R. Thies scored for Trochu. Alix—Michalski, Walter, Chiswell, McKinnon, Elliot, McKinnon, Houtler, Holmes, Bert, Northcott, Wilson.

Trochu—Baffan, Helton, Drew, Evans, H. Hanna, Stone, Christianson, P. Stone, R. Hanna, Hill, Dodd, Beck, D. Hanna.

Great Medicinal Values in Salt

Properties Long Recognized
By Leading Physicians

Salt is a product of many uses. It has, it is said, no less than 1,400 uses, ranging from melting ice on sidewalks to its place in every medicine cabinet.

The medicinal properties of salt have long been recognized, physicians agreeing that they have yet to find a better cleanser for open wounds than brine made from a good table salt.

OTHER USES

They also recommend a heaping teaspoonful of salt and as much ground mustard in a teacup of warm water as an emetic, one teaspoonful in a glass of warm water as a gargle for sore throats, and application of damp salt for relief of burns, insect stings, rash and bites.

Dyspepsia, heartburn and indigestion are often relieved, they say, by a cup of hot water in which a small spoonful of salt has been dissolved, while constipation can be banished by drinking upon rising each morning a quart of tepid water containing two level-teaspoons of salt.

Salt added to the bath gives the skin a delightful tingle and stimulates the entire body. Or, if preferred, it may be used as a rub. For those tired, aching feet, they say a salt water bath every night quickens the circulation and brings immediate comfort. Tender feet, apt to form enclaves, can be banished by bathing rapidly in cold salt water.

FOR MOUTH WASH

Dentists recommend salt as a mouth wash (one half teaspoon full to a glass of warm water) and also for daily use on the toothbrush. They assert that its use as a dentifrice will quickly whiten the discolored teeth and keep the gums firm, pink and free from pyorrhea.

Opticians advise the frequent use of a mild salt solution as an eye bath, pointing out that Nature's own eye wash, tears is nothing more nor less than warm brine. And it is said, that rubbing a salt solution into the hair once a week will keep it from falling out.

Aside for the many and strongly endorsed medicinal uses for salt, there are numerous other tasks for this familiar product around the house.

COOKING HINTS

Are you aware that a little salt, sprinkled in the pan before putting in the fat, will prevent splashing when frying meat? That salt in the oven under baking time will prevent their scorching on the bottom? Or that a pinching will cook more quickly if its container

is placed in a dish of cold water to which a quantity of salt has been added?

Do you always think to sprinkle a little salt on poultry to make it chop easier and flatter? Or, if a boiling egg is cracked, do you remember that a pinch of salt added to the water will prevent the egg from boiling out? And do you know that adding a large quantity of salt to fresh milk will keep it much longer?

Butter may be kept hard with-out ice by setting the dish in which it is contained in cold salt water. To prevent a fish from slipping through the fingers while cleaning it, dip the fingers in salt. Meats will come out whole from stews which have been in salt water overnight before cooking. And eggs may be kept a long time by packing them in salt.

CLEAR SINKS, DRAINS

Sinks and drains can be kept clean from grease and disagreeable odors by pouring hot brine salt through them once a week. To restore to their original whiteness enameled bathtubs and wash basins which have become yellow, wash them with salt and turpentine. Add a handful of salt to the last rinse in wash day and the salt will not stick to the line in frosty weather.

If clothes pins are boiled in salt brine before using, they will last longer and will not freeze to the clothes when it's cold. A handful of salt in rinsing water will keep bluing from streaking clothes in winter. And a little salt in the water when washing colored fabrics will prevent the colors running.

FINE DRY CLEANER

An excellent dry cleaner is made by mixing equal parts of salt and cornmeal, moistened well with turpentine. For restoring trousers to a faded or dingy or rug, wipe it vigorously with a wet cloth which has been wrung from strong salt water. Ants or "vouches" can be driven out of the house or building by sprinkling salt wherever they gather. Any carpet moths can be eliminated by adding dry salt over the carpet or rug before cleaning.

If live in a district not yet reached by electricity or gas, putting a large pinch of salt in the tank of kerosene lamp will produce a better light. Lamp chimneys (Continued on Page 9)

G. L. WILLIAMS
... A "Salt Man"

Firm Manager Is 'Salt Man'

A "salt man" is general manager of northeastern Alberta's million dollar salt plant at Lindbergh, Alberta. He is Gerald Leighton Williams, who comes to the Alberta Salt Company Limited with years of experience to his credit.

QUEEN'S GRADUATE

A graduate in chemical engineering at Queen's University, Kingston, he furthered his studies with a post graduate year in advanced mathematics and chemistry.

A professional member of the Chemical Institute of Canada he first joined the staff of Canadian Industries Limited as assistant superintendent at their salt plant at Windsor, Ontario, in 1932 and was later assistant superintendent of Chlorine By-Product plant and superintendent of the Cansine Soda Plant.

In 1940 he was loaned to the D.I.L. to start up and organize as plant manager of the Phosphate Fertilizer Plant at Windsor.

Three years later, in 1943, he went with the Nicola Chemical Company Limited as technical supervisor and installed and set into operation their fine chemicals division plant and later their insecticide division.

CAME WEST IN 1947

Early in 1947 he joined the staff of J. B. Donald, Ross and Company, Montreal, a firm of chemical engineers working on the Alberta Salt project and during the summer of 1947 came west to supervise construction and organization of the Alberta Salt Company Limited in the capacity of General Manager.

He has an office in Edmonton.

New England, considered one of the world's first medical centres, was the site of the foundation of the first salt-refinement society in the United States.

Sea, Mine and Well 3 Great Salt Sources

There are three great sources of salt today . . . the sea, the mine and the well. And from each of these salt is gathered in an entirely different way.

The solar method originally consisted of scooping shallow basins along the seashore into which the breaking waves would throw salt water. Then, with no chance to drain back, the salt water, or brine, would be dried up leaving deposits of crude salt on the sand.

According to early records, the first actual refining of salt was done on the shores of the Dead Sea, where the coarse salt mixed with the sand was placed in a stone vessel of water and dissolved into brine again.

After the sand had sunk to the bottom the brine was run into shallow stone troughs and exposed to the sun's rays until the water had disappeared, leaving a rough, not fairly pure salt.

In Europe great wooden troughs were erected near the ocean and the brine was pumped into them.

Usually these troughs were built in series so that the first would catch and hold the sand while the brine ran into the next. After one or two such settings, the sun was allowed to evaporate the water, leaving a coarse salt which was then "harvested" by men with rakes and shovels.

But American and Canadian salt was not content to be dependent upon the sun for heat, especially in the west, and a method of separating salt crystals by boiling sea water into large kettles was developed.

Each held 100 or more gallons of brine, and as salt crystals accumulated in the bottom of the kettle they were ladled out and more brine poured in. Later this method was succeeded by what was known as the direct heat pan

process, which employed enormous shallow pans of iron with extremely hot fires underneath.

STILL USE SEA SALT

However, salt is still made from sea and salt lake water in China, France, Spain, Portugal, Italy, Central and South America, the West Indies and to some extent in the United States. In fact a very substantial tonnage of solar salt is produced annually in California and Utah.

The method employed is to pump tremendous quantities of sea or salt lake water into huge ponds where it is allowed to evaporate until the water becomes thick with salt. From there it goes to other ponds, where all impurities are centrifugally removed and the salt crystals are allowed to form.

Salt of this type is of high purity and from it are made the grades, ranging from fine table salt to the coarse crystals intended for industrial purposes. Clean, modern machinery is used to gather the solar salt and carry it to the refineries, where crushing, grading and separating take place.

QUANTITY UNKNOWN

The wealth of salt from the mine is unknown. Not even scientists have the slightest idea of the extent of the vast salt deposits or in what districts and the earth's salt is found in almost every part of the world and in almost unlimited quantities.

Drillers of oil wells often bring in slushes that spout salt water instead of oil, and in Java there is even a salt geyser, or rather a salt mud volcano.

New Salt Plant Costs Over Million

Province Gains Brand New
Industry At Lindbergh

By Tommy Graham

Another new million dollar industry has opened in northeastern Alberta.

At Lindbergh, 150 miles northeast of Edmonton, the independent, western owned and operated Alberta Salt Company Limited have constructed a new refinery.

This salt factory built and equipped at a cost of more than a million dollars, is said to be the finest and most modern plant of its kind in Canada.

And, as say the experts, nowhere else in Canada are the factors for the economical production of salt as favorable as those found at this plant.

Construction of this refinery, which consists of a six-story steel frame process building, a three story packaging and warehouse structure, a brick power house and other auxiliary premises, commenced in June 1947, the first salt being produced in July 1948.

BIG HOPES

A quarter of a million pounds of salt daily is extracted from the plants wells and following scientific processing is made ready for marketing in all grades and sizes for home, farm and industrial use.

Essential in the production of salt extracted from wells is low cost of fuel, unlimited water supply and rail facilities.

The North Saskatchewan river is not more than 600 yards from the plant, a branch of the Canadian National Railway flanks the river on the north and natural gas was located 1200 feet from the surface.

Two salt wells and five gas wells were drilled by the company and following the completion of the building construction, operations on producing salt commenced.

SAME METHOD

A salt well is drilled down to the rock salt deposits in much the same way as a water, gas or oil well, except that it has a double casing or pipe—one inside the other.

A seven inch hole is drilled down to the salt contact and another pipe approximately two-and-a-half inches in diameter is inserted inside this and lowered down to the bottom of the salt bed or as deep as you want to work.

Pure, fresh water is pumped down the outer casing to the salt vein below and forms a brine or mixture of salt and water which, being heavier than water, sinks to the bottom of the cavity and is forced up the inner casing by the pressure of the fresh water coming down.

In sections where the salt deposit

is at a reasonable shallow depth, the pressure of water pumped in is sufficient to force the saturated brine to the surface.

But where the rock salt is deep, it becomes necessary to employ compressed air to elevate the brine. Thus far, however, this latter process has not been required at the Lindbergh plant.

Water mines salt just as efficiently as can most skilled miners. It digs great holes in the salt veins far under the earth's surface, often dissolving salt that is thousands of feet away from the well itself. The brine coming up brings only those impurities which are in solution, leaving practically all the solid foreign matter ordinarily found in rock salt at the bottom of the well.

COMPARISON

The brine from a salt well, according to the plant employees, contains about two-and-three-quarters pounds to the gallon.

Sea water, it is said, contains about one-quarter pound to the gallon while water in the famed Dead Sea is said to contain two to two-and-a-half pounds to the gallon.

As the brine comes into the refinery from the wells it goes first into great settling and chemical treatment tanks—two 100,000 gallon tanks—where it is required to stand until any impurities which have come up from the well have settled to the bottom.

After this process the brine is now sparkling clear and free from any impurities and is ready to be changed into salt.

It is first placed in the vacuum evaporator where the water is boiled off and cube like crystals of salt form and drop to the bottom of the evaporator where they are removed by pumps. This newly made salt comes from the evaporator in a wet condition.

Small drops of brine still cling to the crystals, and the whole mass has a slushy appearance.

SLOW PROCESS

To separate the salt crystals from the brine, the slushy mass is passed over a rotating screen where the bulk of the moisture is filtered off. To obtain bone dry crystals, air at very high temperature is sucked through the salt mass by

(Continued on Page 9)

Oil Directors Are Responsible For New Plant

Western Canadian businessmen, directors of three independent oil companies which together have more than 15,000 shareholders, gave northeastern Alberta a salt plant.

Knowing that Alberta had an abundance of salt and believing that the western market wasn't receiving the quantity it required, they decided to do something about it.

For a number of years the trio of oil companies had been carrying on an exploratory campaign in search of oil and gas, but the directorates became impressed with other resources requiring development in the rich and fertile Alberta.

They retained the services of a prominent industrial chemist, J. Richardson Donald, of Montreal, Donald, of the firm of Donald and Ross acted as one of the

EDMONTON BULLETIN, Monday, March 21, 1949 7

principal advisers of the Dominion, now the dominant operator in the field; the Anglo-Canadian Oil Company, another concern which received its start in Turner Valley and which had taken active part in the exploration in the province; and the Calgary and Edmonton Corporation, a company formed to develop the mineral rights of the only C. and E. railway lands in Alberta.

Head offices of the latter company are in Winnipeg while the Anglo-Canadian oil concern makes Calgary a home office.

With Purser on the Board of Directors of the Alberta Salt Company Limited, are H. B. Milner, K.C., Edmonton and J. Grant Spratt, Calgary, president and vice-president respectively of the Anglo-Canadian, C. E. D. M. Baxter, Winnipeg, president of the C. and E. J. F. Macmillan, Winnipeg, of Oster, Hammond and Nanton, E. Gerald Hannan, director of Home Oil and J. R. Donald, of Donald and Ross, Montreal, who is also chemical engineer for the company.

The three oil companies backing the salt venture being the J. & O. Company, with head offices in Calgary, which opened up the "north end" of Turner Valley because of its forecast and is

Splendid Contribution
to
Alberta Industry

Government of the Province of Alberta

MILLION DOLLAR salt plant, considered to be the most modern in Canada, opened Saturday at Lindbergh, 150 miles to the northeast of Edmonton and on the bank of the North Saskatchewan river. Buildings of the plant, shown here, consist of a six-storey, steel-framed build-

ing which houses the main plant, a three-storey warehouse and packaging plant, and a power plant. Production of the new factory is said to be a quarter of a million pounds per day of all grades for all purposes, from farm use to table. Alberta's other resources, too, come

into the picture as the plant is powered by five gas wells located on the site. Construction of the plant followed mainly on the great increase in the demand for salt from Canadian industry.

New Alberta Plant One of Finest Here

Salt in grades and sizes for all household, farm and industrial purposes is produced at the Alberta Salt Company Limited plant, which opened Saturday, at Lindbergh, 150 miles northeast of Edmonton. The valuable plant, which off-sets the industrial way of thinking and foresight of the men who owned and managed salt supply, is a Calgary barrister, M. M. Porter, K.C., is president of the Alberta

Through the enterprise of these three companies—the Anglo-Canadian Oil Company Limited and the Home Oil Company Limited, with head offices in Calgary, and the Calgary and Edmonton Corporation, with head offices in Winnipeg—which chose to develop the property rather than dispose of it to the outside interest, Western Canada now has its first western-owned and managed salt supply. A Calgary barrister, M. M. Porter, K.C., is president of the Alberta

Plant superintendent is H. Ayres. At Lindbergh, three salt beds of unusual purity, and said to total more than 1,000 feet, were located between 2,000 feet below the surface in the Devonian formation.

Researchers discovered natural gas, required for fuel, underlying the general area in the Viking, Colony and Lower Devonian sands at only 80 to 1,500 feet below surface. With the townsite being on the Canadian National Railway line

and the North Saskatchewan river, less than 600 yards away, it proved no problem for the backers of this company to decide the location of their plant.

Construction of the million dollar salt factory began during the last week in June, 1947, with C. H. Whitman and Company of Edmonton as general contractor. One year later the plant went into production, and for the past four months has been producing in excess of 125 tons of salt daily.

AND YOU TOO

History of Product Is Older Than Man Himself

History of salt is older than man. Indoubtedly most of you know what salt is. In fact, many of you may even be familiar with its chemical name . . . sodium chloride.

Not all of you may know that salt is absolutely essential to normal health; that if all the salt in our systems were suddenly removed we could not live 48 hours!

We are all aware that salt is present in our bodies because both our perspiration and tears are salty. Yet few of us understand the function of that salt . . . that it is so to speak, a poison whose duty lies in protecting our blood and keeping our chemical fluids in proper balance.

Fortunately the human body rarely suffers from a lack of salt. For Mother Nature wisely implanted in us a craving for it which must be satisfied. Unsalted food is flat and unappealing, and the average person finds it a hardship indeed to go even one meal without this familiar seasoning. If completely free of salt, the human body would experience extreme discomfort and in time would succumb to death.

Thus it is certain that salt has been eaten by men and animals from the time they first appeared on earth. We can, in imagination, picture our cave-dwelling ancestors forcing their way through dangerous mountain passes, swimming, ranging, hunting and fighting off ferocious beasts in order to obtain that mineral so necessary to life . . . common salt.

In attempting to trace the history of salt we can not hope to go beyond the time when man first learned to write or record his manner of living by means of rude carvings on stone. Since that time ample evidence of the ancient use of salt has come down to us before them we can only suppose that man's desire for it made its use a necessity.

Historians, for the most part, agree that never have there existed human beings who maintained themselves without partaking directly or indirectly of salt. They point out that the very few races known to have lived without salt ate liberally

of animal foods containing that element in abundance.

The first reference to salt occurs in that greatest and most glorious of all books . . . the Holy Bible. In the Book of Job which was written about 2300 years before the birth of Christ, is found the line, "Can anything which is unsavory be eaten without salt?"

The Bible also contains 30 other references to salt, perhaps the most familiar of which is the story of Lot's wife. Lot, you may recall, was a nephew of Abraham and lived with his wife and two daughters in Sodom. Shortly before that wicked city was to be destroyed for its sinfulness, two angels came to Lot and warned him to escape, cautioning him and his family not to look back once they departed. Lot's wife, however, disregarded the command, and on turning to

look at the burning city was changed into a pillar of salt.

Although the Bible traces the history of man back four thousand years before Christ, salt had been used for so many centuries before then that it is quite impossible to determine its origin as a seasoning for food. The Chinese, the Egyptians and the Hindus all attempted to learn the time and place of salt's discovery, but because it had been in use long before man learned to record anything their efforts were unsuccessful.

We can, therefore, do no more than guess, and our many guesses are as good as another's. Some say salt was originally discovered on weeds coked up by the sea. Others believe it was first found in the form of exposed rock salt, such as the salt licks used by wild animals. Historians, though, are rather generally agreed that man's first salt was the crude deposit left by the evaporation of sea water.

Salt Sources On Land, Sea

(Continued from Page 6)

Occasionally these veins occur near the surface of the earth, and in rich lumps are merely shallow pits in which the salt lies.

In most cases, though, the rock salt lies far beneath the surface, and is mined very much after the manner of coal. Shuttles are sunk and working galleries are run off there just as in a coal mine, with all modern conveniences and machinery.

Deposits of "halite" as rock salt is known to scientists, are to be found in Europe, Asia, Palestine and United States. Salt mines are operated in this country at Van Zandt County, Texas; Livingston County, New York; New Iberia Parish, Louisiana; Wayne County, Michigan; and Rice, Reno and Glenwood Counties in Kansas.

Portions of Utah and California there are thick deposits of rock salt just as in a coal mine, with all modern conveniences and machinery. The salt is mined by open pit methods.

HYDRAULIC MINE

The salt well might easily be called a hydraulic or water mine, for it actually mines rock salt by means of water. It is by the process that the Alberta Salt Company Limited produces its salt at the company's plant at Lindbergh, near Elk Point.

Salt Has Many Values

(Continued from Page 6)

say should be polished with dry salt after washing to toughen them and prevent their cracking. Goldfish thrive if a teaspoon of salt is added to their water once a week. Deep clean uses which have become fast at the bottom of the sea are cleared by a solution of salt and vinegar in stand oil.

But salt does not confine its usefulness to our homes by any means. It is essential in the soap, paper, steel, oil, tanning, mining and textile industries; is used by farmers for feeding stock; is widely employed by packers and fishermen for preserving meat and fish; is consumed in vast quantities by the dairy industry in making butter and cheese, and is an ingredient without which the baker would be forced to shut up shop. Small wonder that more than nine million pounds are produced in Canada and the United States.

The most amazing thing about salt is that when judged, measured, men claim it aids in the curing of meat.

Salt, then is not "just salt" anymore. It is a scientific product, produced by elaborate and costly machinery according to the utmost exactness and having medicinal properties used in the past. Salt today is as indispensable to the modern, improved salt mine as the ancient, simple Dead Sea as a source of salt.

From dark, busy streets car companies now use far better salt for their tires than the old tracks than a king's ransom could have secured five hundred years ago.

Salt, then, though it costs little to produce gives much in return.

Plant Cost Over A Million

(Continued from Page 7)

plant fans during this filtering operation and the last of the moisture is actually boiled off the crystals.

From the rotary filter, or filter-dryer as it is called, the salt, containing less than four one-hundredths of one percent moisture, drops like hot sand and must be cooled before storing or further handling. The salt is therefore passed through a rotating tube, roughly 40 feet in length and four feet in diameter, where a blast of cold air provides the necessary cooling.

By this time it is ready for shipment on the automatic sliding screens and following this screening process it winds its way to the storage bin to remain until it is weighed, packed in bags and containers and made ready for shipping.

The majority of Canada's salt, according to officials of the Alberta Salt Company Limited, is now produced in Windsor, Nova Scotia and the Goderich, Ontario areas. There are plants, however, at Neepawa, Manitoba, and one at Watrous.

The Canadian demand for salt for industrial purposes increased by 30 per cent during the 10 years prior to 1940 and is continuing to increase.

This demand is for the most part in Eastern Canada.

However, the establishment of the Alberta Salt Company plant at Lindbergh will make available western salt to replace that formerly obtained from the east.

The million dollar plant—one of the finest in Canada—is destined to be a million dollar producer.

Salt Has Played Historical Roles

From Dark Ages Past Importance Is Unchanged

"One of the most interesting things about the history of salt is that this magic white sand, as the Indians call it, has always played an important part in the superstitious and religious beliefs of the world."

From the dark ages of the past to the present day salt has been valued by hundreds of creeds, tribes and races not only as a seasoning but as a source of protection against sickness and evil.

In the Bible are many references to the use of salt in establishing a covenant or agreement.

It is thought that this was due to the wide-known preservative power of salt, and that those entering into an agreement believed it would prove more lasting if a certain amount of salt was exchanged by the contracting parties.

Even before the dawn of Christianity salt was considered sacred. The early Greeks worshipped it so less than the sun, and among the Hebrews it was a sacred religious custom to rub all newly-born babies with salt to insure their well being.

This practice exists even to this day in parts of the Far East, as does also the custom of making small children wear small bags of salt suspended from their necks to guard them from the "evil eye."

In certain districts of Russia no bride and groom shall enter into their new home without carrying a quantity of salt to be thrown to all corners of the house.

Doing so is believed to protect them from evil and to encourage happiness and good health. A rejection of this belief is found in our modern custom of throwing salt over the left shoulder to prevent a quarrel or other bad luck when we accidentally spill a salt container.

The Greeks had a saying that no one should trust a man without first eating a peck of salt with him. This, however, was based not so much on superstition as on the realization that by the time one had shared so large a quantity of salt with a man he would no longer be a stranger.

Another popular superstition about salt is that at once the delight and despair of every child is the belief that scattering a few grains on a bird's tail will make easy to capture the creature.

Quite as amazing to the ages is the superstition that if a man throws salt on a woman without her knowledge she will more readily respond to his love making.

OSLO, (UPI) — A nationwide drive to obtain books for "floating" libraries aboard Norwegian merchant vessels has brought in an estimated 100,000 volumes. A total of 200,000 volumes is required.

EDMONTON BULLETIN, Monday, March 21, 1949

Rennie Ouch Dr. Hal Richard

Jim Rennie defeated Dr. Hal Richard 21-11, 25-5, to win the finals of the city senior handball championships at the weekend. Dr. Richard was the defending champion.

Rennie now plays the winner of the Clark Ready-Art Warburton semi-final for the senior championship.

Millet Ladies' Aid Plans Activities

BULLETIN, March 21.—Millet United Church Ladies Aid met for their March meeting at the home of Mrs. J. West, with 16 members and six visitors present. Following general business it was decided to hold an Easter tea and sale, and materials have been ordered for the fall bazaar. The April meeting will be held at the home of Mrs. R. W. Rownack.

Congratulations to the ALBERTA SALT CO. on the opening of their fine new plant . . .

CRANE PIPING EQUIPMENT

Serves Progressive Alberta Industry

Alberta Salt Co. LINDBERGH ALBERTA

In the latest great undertaking developed from Alberta's abundant natural resources, Crane equipment is playing a vital part.

At Lindbergh, where oil was sought and salt found, engineering skill has developed a plant and process which will make an important contribution to Alberta's continuing industrial and economic expansion. The operation at the Alberta Salt Company is typical of modern industry in that it requires a vast intricate network of pipes, valves and fittings. These must carry and control the flow of many fluids — process liquids, water, steam, gases, liquid fuel, etc. As has become almost standard practice throughout Canada, Crane was called upon to supply this important piping equipment. Here as elsewhere, standardization on Crane provides a 3-way advantage:

ONE SOURCE OF SUPPLY offering the most comprehensive selection of brass, iron, steel, and alloy piping materials for all applications.

ONE RESPONSIBILITY to help assure the best installation, and to avoid needless delays on the job.

ONE STANDARD OF QUALITY in every item, assuring the highest efficiency throughout the piping systems.

Legion Seeks Curtailment In Immigration of DPs

LOTS BEING TAGGED FOR CITY GARDENS. Space for vacant lot gardens is now being allocated by the Edmonton Horticultural Society, announced H. C. Hunter, secretary, at a recent executive meeting of the society. Persons who wish to claim the same land which they cultivated last year should do so prior to April 1. Mr. Hunter said. Lots will be allocated subsequently on a "first come, first served" basis. Though Edmonton's increased building program has reduced the amount of vacant land available in the city centre, ample land is available on the outskirts, the secretary said. The Society, now in its 41st year, will sponsor an annual flower and vegetable show at the Macdonald Square August 16 and 17. The 1944 prize list is now being printed and will be distributed before the end of the month.

Texaco Starts New Wildcat

By Don Flach
Rigging has been completed on the Texaco-McCull Wildcat at Telfordville on the 16-11-50-20. Contractor is the Robertson-Methany Co. of Wichita Falls, Texas. The company is also making a farm-out to Shaw Petroleum which is moving a rig from Lloydminster to drill on the 4-1-50-27 near Spruce Grove.

Drilling is going ahead on Texaco's No. 1 at surface casing has been set at 600 feet. Difficulty is being encountered at the Superior Lake well, penetrating through the casing and cement to the oil bearing sand. It would appear that cement forced down the well to set the casing is irritating the porous sand, and causing perforating in an attempt to get through the oil is continuing.

Ledger Creek No. 1, proposed with mechanical troubles at 3,500 feet, is to resume drilling today. An additional 200 feet are to be drilled for information. No. 2 is in bedrock. North Continental No. 1 at Brudenheim has encountered a heavy gas blow at 1,000 feet and is trying to put heavy mud in the hole. The gas blow is making progress with the well difficult. Officials say the well is still under control.

Anglo-Texas No. 7 in bedrock has gone on production and for the last four days has reported production of 400, 800, 800, 727 barrels respectively. No. 8 is running in the hole. The well will be shut in at 10,000 feet.

Anglo-Texas Woodhead No. 1, three miles east of Sheepskin discovery is still drilling at 5,000 feet. The well has been producing since 1932. The well is still under control.

General Petroleum will participate in the underwriting and Roy Co. and J. & J. Co. have been in the hole. The well is still under control. The well is still under control.

SIGN PACT WEDNESDAY

WASHINGTON, March 21.—(AP)—The International Western Conference met today to put final touches on a new agreement whereby some 430,000 signatories will be added to the C.P. signatories. The new pact probably will be signed Wednesday. Five co-signatories—Canada, the United States, Australia, France and Uruguay—will be added. The pact will take effect.

Coarse Grain Demand Holds Prices Steady

WINNIPEG, March 21.—(CP)—Oats and barley futures prices moved narrowly in a fairly active session on Winnipeg Grain Exchange today. There was routine buying by shippers in the early trade, and fair investment demand in both grains as the session wore on. An easier tone at Chicago brought out some commission houses selling from Saturday.

This same weakness at Chicago was reflected here by commission house selling in rice. Some buying was indicated on the decline, the source being American issues and export interests. Trading was moderately active. The price of rice was held steady from Saturday.

No export business was reported. The first full day of spring, with its prospect of another year of bumper crops, was too much for the grain market. With May wheat leading the way, prices advanced downward. Prices for around three cents in wheat at times.

The broad cereal area 1/2 to 1/4 cent with a reduction in the government premium for cash wheat and receipt of additional movement in parts of the wheat wheat belt. At Kansas City, the government was offering 30 cents over May wheat for cash grain, down one cent.

Soybeans slipped with grain, falling more than three cents at times. Wheat closed two to 2 1/2 lower. The stock was up 1/2 point. The stock was up 1/2 point. The stock was up 1/2 point.
